Distributor Power Unit Program

INTRODUCTION

The SPX Stone Pick -A- Pack Product Range is based on a system of modular construction which was pioneered by Stone Hydraulics when the company was founded in 1968. This concept and the components utilized have been continuously refined and improved through the years. Today, SPX Stone applies the most advanced manufacturing technologies and the highest quality materials and components available to provide this unique and extremely flexible product range.

This booklet is designed to aid the user in selecting a combination of pump, motor, reservoir and valve combination which will precisely suit their needs.

All of the components in the Pick -A- Pack product range are designed to fit interchangeably with mating components. All components are modular in design and the "International" Endhead is the key component of this system of interchangeability.

International Power Unit Ordering Codes

Basic Selections

Notes:

This system may be used to order assembled units made up from any combination of parts found in the Distributor Pick - a - Pack Program. It will yield unit prices equivalent to the sum of the component parts plus the assembly charge.

If wishing to buy the kits to build up this unit, add "K" as a prefix to each of the ordering codes. For example

- | | |
|-----------------------------------------------------------------------------|------|
| - Ordering code for Extended Duty 4.5" DC Motor | MD3 |
| - Kit including Extended Duty 4.5" Motor, Mounting hardware, coupling, etc. | KMD3 |
